

Personal  
Anchoring Device

# Don't Let The 6' 100% Tie Off Rule Cost You.

## Old tie off methods diminish your productivity

Bottom Line: *This Tool Can Save Time/Money/Cost of Fines*

Save 2 hours per week = \$ 250 = 1 month payback

Buying a Beam Runner = Savings

Cost of the Beam Runner anchor tool will be off set by the time saved in daily operations. The Beam Runner will multi-task saving the cost of additional fall protection equipment, Your worker will carry less: at least one beam slider and in most cases also one beam clamp

## Not tying off is very expensive

1 Fine = \$5,000 +

1 Fall = \$100,000 +

1 Fatality = \$1,000,000 +

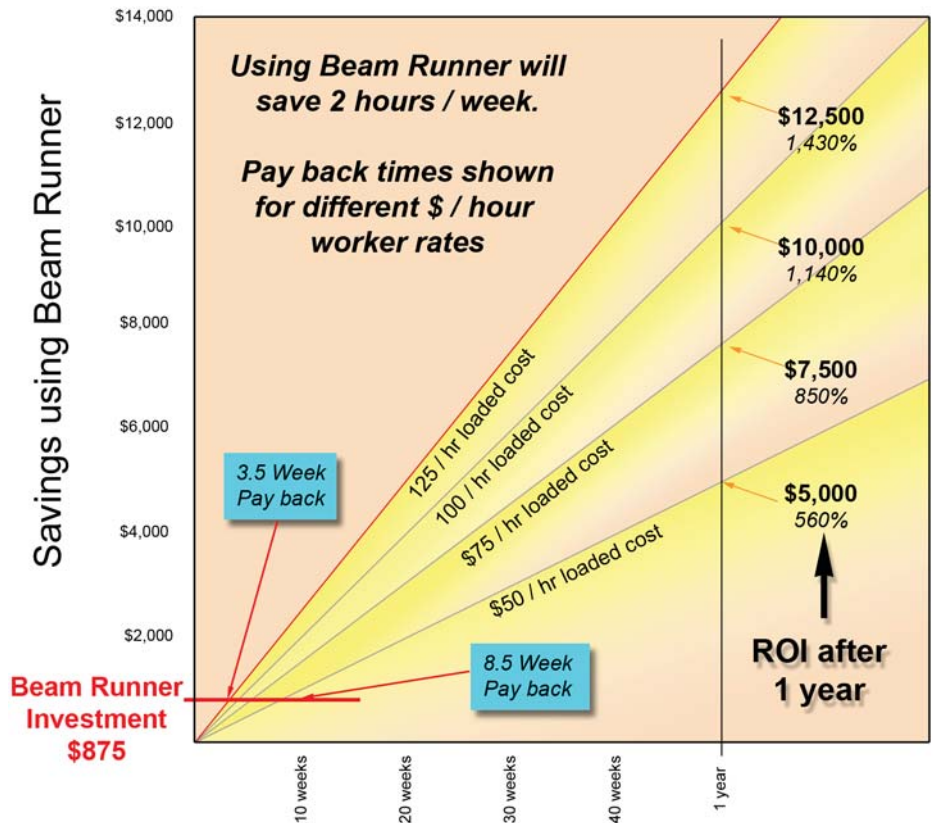

The user friendly Beam Runner was designed with the worker and 100% tie off in mind. In less then one minute the tool attaches to the worker and existing fall protection equipment. Then it attaches to the structure using one hand in less than ten seconds. Anchor points that were not available before can now be utilized. Anchor points are now faster, easier and safer then ever. **This will help ensure that workers tie off 100%.**

It is small and lightweight: 3.5 lbs., and is as easy to use as a clothes pin. The tool is carried in a thigh mounted holster (included with the tool) to insure the worker's comfort and easy access. Right & left hand models are available.

### Workers Will Use The Beam Runner

- Simple to use
- Small / Lightweight tool comes with thigh holster
- MORE Anchor points (horizontal vertical diagonal)
- Anchor point for horizontal life lines
- Anchor point for retractable life lines
- Requires one flange to connect to beam or column
- Requires only one hand to connect
- Ability to hold on with other hand
- Can be used as a step on vertical columns
- Less wear and tear on worker to tie-off
- Simplifies PFAS Training

## At least 560% ROI with Beam Runner
